

The unity of hypertension societies in Asian countries and regions 2021

October 15, 2021, OKINAWA, JAPAN

Statement of the Asian Hypertension Society Network Okinawa Declaration

The Okinawa islands located in East Asia have a unique geographical location and have numerous histories as one of hubs for logistics and cultures in Asia since the Age of Exploration. At the time of the 43rd Annual Scientific Meeting of the Japanese Society of Hypertension in Okinawa, we announce the Okinawa Declaration for the unity of hypertension societies in Asian countries and regions.

We, hypertension societies in Asian countries and regions declare to collaborate to overcome hypertension and hypertension-related diseases and will strive to:

- Create an Asian multidisciplinary network for the management of hypertension and hypertension-related diseases.
- Actively promote clinical and experimental investigations for hypertension research to encourage participation from researchers and practitioners from Asia.
- Share Asian evidence to promote the establishment of standardized management of hypertension in Asia.
- Continue to work toward developing Asian consensus guidance for the management of hypertension, using a collaborative approach and taking into account diversities within Asia.
