

Chairman's Message

Joint Congress on Global Health 2024
Congress Chair

Jun Kobayashi

The conference venue is a beautiful newly constructed beachside in Itoman City near Naha Airport. We are planning to make this a convention that our guest from foreign countries and members of both the Japanese Society of Tropical Medicine (JSTM) and the Japan Association for Global Health (JAGH) can enjoy, thus I would like you to participate this conference on site.

This conference will be the sixth time that the JSTM has been held in Okinawa since 1974, when Prof. Masuya first hosted the conference in Naha City. This will be the second time that the JAGH has been held in Okinawa since 2013 in Nago City. Okinawa may be a special place for both societies. Perhaps it is because of how interesting Okinawa is located in the subtropical zone, where tropical diseases have been endemic in the past, and with its unique public health history. This conference will respectfully look at the history of Okinawa as we have in the past again, moreover the discussion will also ask what global health in Japan, as a member of the Asia-Pacific region, should be doing about it from now on.

There are many ideas about the future perspective of global health in Japan. But I believe that no one pursue an exclusive club with its origins in colonialism. We have created the vision of "Proposals from Asia and Pacific Islands" in the hope that we can talk about how we can contribute to Europe, America, and the African continent while continuing to work together with our neighbors in the Asia-Pacific region.

Yesterday, I was able to see "EISA", which is traditional performances by youth groups in various parts of Okinawa. The sea was shining blue as if it was the calm before the storm as the typhoon approached. On the other hand, not a day goes by when I do not hear Korean or Chinese in the streets. Interrupting lectures with the sound of Osprey is an everyday occurrence. Unfortunately, health issues for teenagers on this beautiful island of longevity are piling up. The heat is so hot that we can feel firsthand that the density of vector mosquitoes is increasing.

I sincerely hope to talk with you all in Okinawa.
